

# ALL RAIL ROUTE TO HEART OF THE YUKON

(By Associated Press)  
DAWSON, Y. T., Jan. 26.—(By Mail)—The project for construction of a railway to connect the Yukon with a transcontinental line of Canada, recently laid before the Yukon Development league, has attracted wide notice and favorable comment in Yukon territory.

The proposed line sought would feed Atlin, White Horse and Dawson, and in connection with the Yukon river and Alaskan railways, would form part of the northern net that could deliver food, freight and troops to every northern point. Its extension across Bering straits to a connection with the Siberian line, often suggested in the past, is also regarded as feasible. The building of these last links in the communication system of the northern zone, it is believed, would give Alaska and the Yukon an impetus of development such as no other project could bring.

Arguments from other aspects are

advanced by those favoring the project and backing the movement to bring action by the Dominion. These include a large possible development of the placer fields, the vast copper fields of White river, White Horse and the belt between the newly begun hard-rock properties of the Atlin

## Shortage of Dwellings Reaches Acute Stage

(Correspondence Associated Press)  
LONDON, Feb. 16.—This country needs immediately at least 2,000 dwellings for its working classes, according to Dr. Christopher Addison, president of the local government

board, whose housing scheme has just been approved by the British war cabinet. A bill outlining his ideas is to be presented soon to the house of commons.

"The most acute question of the moment," said Dr. Addison, in explaining his proposals, "is the shortage of houses. The government wants local authorities to move at once and therefore a time limit will be put on government aid." State assistance, he continued, will be given only within the next twelve months to schemes submitted to the local government board and which must be carried out within the next two years.

Housing commissioners are being appointed to help the various authorities; each commissioner to have a staff including an architect and a surveyor.

Fittings are to be standardized, "but this does not mean," Dr. Addison's statement says, "that houses are to be built on one pattern. The government is anxious to avoid any high calamity. There will be plenty of scope for individuality, to suit local conditions and raw materials."

An entirely new proposal is put forward with regard to slums, the same financial system to be given for clearing and improving unsanitary areas as for building new houses on new sites.

## RICH HARVEST WON BY AN ALLEGED ENGINEER

Don Van Wageningen, who says he is a mining engineer, was arrested by Deputy United States Marshal Dolph S. Bassett, at his home on Monterey road, South Pasadena to answer to a federal indictment returned some weeks ago charging use of the mails in a scheme to defraud.

Postoffice Inspector Cookson says Van Wageningen made a specialty of posing as a mining engineer, possessed of peculiar knowledge as to the value of certain property, and in a position to finance any proposition that looked good. In the two letters quoted in the indictments he agreed to raise \$50,000 within 60 days for the development of the Arizona Daisy Copper company of Prescott. Later on he wrote to W. S. Foutz, secretary of the company, setting out his ability to finance the corporation. He asked for \$100 to make the trip from Los Angeles to Prescott and return. Foutz said this was sent to the accused, who then dropped out of sight.

It is said that Van Wageningen has worked a similar game at San Francisco, Seattle, Portland, and other points on the Pacific coast. It is said he reaped a rich harvest in San Francisco and secured various amounts from persons interested in mining property who had something they desired to exploit on the market, or wished information as to investments in mining holdings. He made a specialty of writing to the managers of enterprises who were in need of money for development work, and when the unsuspecting advertisers would send him money to buy a ticket to the property, Van Wageningen would keep it, according to the evidence in the possession of the federal authorities. His operations were along the lines of petty larceny, as it charged the largest amount ever secured in a single case was \$500.

In his letters he gave references as to his standing, using the Engineers' Journal of New York, and the Mining World of Denver and declaring that he was the prominent figure in the development of the Old Dominion mine of Globe, Ariz., and the Inspiration of Miami, Ariz.

The defendant was arraigned before Judge Trippett, but not being represented by an attorney, his time to plead was extended until Monday.

In default of bond of \$2500 he was committed to the county jail.

Some men are content to play second fiddle, while others will never be content until they swing the baton.
